### Product Description

*Suitable for lifting solid material, not porous, having flat surface: cut-to-size panels, tiles, stairs, small slabs, metal panels, honeycomb panels, steel elements, window's glasses, double-glazed windows.* Fast and simple handling unit, compact and sturdy constructed, suitable for continuous and heavy-duty use. Ideal under the hook lifting device, perfect complement to lifting equipment, manual and [pneumatic](#) option available. Equipped with vacuum reservoir, built-on safety devices with acoustic and luminous alarm systems, vacuum gauge. A big step ahead is our distinctive rubber sealing, flexible, resistant and long-lasting, that allows gripping of any material finishing (raw, polished, honed, flamed, bush-hammered, sand blasted, etc.) **Several configurations available, make the suction pad a versatile and safe tool**
